

CHROME PLATED HOT & COLD MIXING UNIT — 3600M-C SERIES

SuperKlean's Chrome Plated Hot & Cold water mixing unit was specifically designed for thoroughly blending hot and cold water instantly. The unit uses "Y" style body mechanics with lift check valves and ball joint unions for superior flexibility during installation. SuperKlean's mounting plate has the same dimensions as most of our competitors' units and is included along with a hose rack for easy user access and clean operation.
